

Holt County Sentinel

OSBEOK, MISSOURI, MARCH 20, 1918.

Let us have peace!

His says he has returned. It was true.

Come, Reformer! Meet us half way!

"Grace, Mercy and Peace!"

WINDY DODDS is a regular borrower of the Sentinel.

"AUGUSTINE," Reformer Irvine, Windy Dodds and Slippery-Slim Adams.

The Reformer is unhappy. We are not.

Show us a granger who don't turn up his nose at these self-elected leaders, Reformer, Windy and Slippery-Slim.

The Reformer says he don't want advice from anybody but his friends. That is a genuine way of saying he never receives advice from anybody.

The Great American Letter Writer, Windy Dodds, has three communications in yesterday's Press, which is the only paper in the United States which will give him a line.

Now that the banks all over the country are paying out gold, silver and greenbacks, indiscriminately, we call on the Reformer of the Press to take up the position on the "front-yard" business.

Our opinion of the good sense of Slippery-Slim Adams is improving. He is the only man of our last week's barometer who has shown the judgment to take it in the same spirit in which it was intended.

When you read these dispatches in yesterday's Press in regard to the Sentinel, just think of what we could say and what we don't say. The Sentinel certainly has the best natural editor of any paper in the state.

This is the largest most hearty at the discomfiture of the Reformer, Windy Dodds and Slippery-Slim Adams. They have tried to dole out numbers of them for years in marriage at their expense during the past week, and their names are now bywords at every grange in the county.

Admirer any set of demagogues, by simulated bluster, may humbug a large number of people for a little while; but their reign is only temporary. We warned Reformer Irvine, Slippery-Slim Adams and Windy Dodds several months ago that a day of retribution would come for them. It has now arrived and they are disgruntled and unhappy. They should have heeded the Sentinel.

The Sentinel has nothing against Reformer Irvine. He has never specially interfered with us in any way, and we would much prefer to be on cordial terms with him. But he must have the cheek of a government mule if he expects to pass through the coming campaign without having his past derisions stung.

The Reformer says we are meddling in private affairs. Hence we exposed the attempt of himself and Windy to catch the grange. It was too bad to break up that little game, wasn't it? Just one hilarious exposure from the Sentinel demonstrated that grangers are not so easily duped.

They now laugh with the Sentinel, which never rendered to them in any way, but simply treated them as it did all other senseless things.

There is an old adage which says: "Never joke with children and fools." If we had heeded this time-honored maxim we would have been spared a good deal of ill-temperament in yesterday's Press. Not handling it, however, we are treated to an unlimited amount of abuse at the expense of a merry barometer which appeared in last week's Sentinel. Well, we can stand it. The whole county from one end to the other, is in a state of glee at the expense of these buffed conspirators, and so one will feel to understand the genuine which entertains them in showing the Sentinel because it humorously exposed them.

Windy Dodds publishes in yesterday's Press a receipt which he holds for subscription to the Sentinel, which he says we have persistently refused to send him. Windy lies. He sent one of his gorgeous four-color communications several months ago and when we declined to publish it he promptly wrote us an abrupt letter ordering his paper stopped. Of course we stopped it; but he can have a public letter sent us to do so.

P. S. It is only just to add that previous to our declining Windy's communication he was an ardent friend of the Sentinel. But our refusal to publish his misdeeds cannot be said to be so promptly and cheerfully.

THE LAW ENFORCEMENT

The probabilities now are that the Revenue law passed by the legislature of this state last winter will not stand. In almost every county in the state suits have been commenced, under this law, against delinquent tax-payers, but chiefly county in which any of the cases have been actually tried in Livingston. Fifteen suits were brought to test the law, and Judge Broadhead decided that the law is not valid and retroactive. The suits were therefore thrown out of court.

ST. JOSEPH, MISSOURI.

The St. Joseph Herald of Tuesday says: "For all practical purposes specie payment has been resumed. The St. Joseph banks have already in many instances paid out gold and silver on checks in preference to greenbacks. This is a healthy condition for the country, and it is not surprising that the premium would not be so high as it was some time back."

ST. JOSEPH, MISSOURI.

WHO ARE THE REAL GREENBACKERS?

Not untruly now-a-days the loudest shriekers for unlimited greenbacks are found to be those who, when greenbacks were first issued, denounced them as "Lincoln's scribbles," and did all in their power to depreciate them. Greenbacks were a necessity in order to carry on the war against the rebellion, and they were issued by the government while it was entirely controlled by the Republicans. Hence, it is plain that whatever credit or odium attaches to the issuing of greenbacks belongs to the Republican party, for that party is responsible for them.

The anti-war Democrats opposed them in the beginning and constantly did all in their power to make them worthless. Notwithstanding this opposition, however, the greenbacks obtained a strong hold on the affections of the people, and in the past few years the old enemies of this sort of money have been forced to take a new departure. They now claim to be pro-excellence the friends of greenbacks and want them issued in such vast quantities as to render them really worthless; and in order to do away with all doubt as to their intentions, they propose to change the words on the face of them.

At present the greenbacks read: "The United States Will Pay the Bearer Dollars." But these new-fangled greenbacks propose to make them simply read: "This is Dollars."

When the Republican Congress first issued the greenbacks they pledged the faith of the nation that they should be redeemed in gold or silver as the government became able to do so. That pledge the government is now about to carry out. For all practicable purposes the payments are already resumed.

The premium on gold is nearly nominal and the large stores in the cities are now paying it out in change just as they did before the war; and, although the time fixed for the government to resume is not till the first of next January, there would be no run on the treasury if resumption occurred to-day.

It is for this that the Sentinel has been contending. We like the greenbacks—we have always been friendly to them—and we want them just as good as gold. That time has at last arrived and we are happy.

MOOREHEAD.

The St. Louis Republic truthfully says that, as so many persons imagine, the country needs more money to float it out of its embarrassments, the silver bill needs this necessity. It provides for more money. The supply in the country at present consists of greenbacks and national bank notes, \$648,000,000; and subsidiary silver coins, \$58,000,000. Before the passage of the silver bill this was all the money that could be brought into circulation, because gold was at a premium, and was for that reason hoarded by all who were fortunate enough to own it, and it was not lawful to sell the silver produce of our mines into dollars. But the silver bill breaks down the restrictions. It authorizes the selling of 4,000,000 silver dollars per month for an indefinite time—and this, too, without any reduction in the volume of greenbacks. Secretary Sherman has deliberately taken the ground that the greenbacks after being redeemed may be paid out again, so that there shall not be any contraction in the currency volume. But it is not probable that there will any substantial amount of greenbacks presented for redemption even after the day of redemption arrives. The late issue, January, 1917, for redemption. But suppose the day were April 1, would any person demand cash for his greenbacks? The treasury has the option of redeeming either in gold or silver, and it would redeem the notes first presented in the cheaper metal which is silver. But who would want 1,000 silver dollars, forming a burden as heavy as a man can carry on his shoulder, in exchange for \$1,000 greenbacks, equally valuable, which a man can carry in his vest-pocket?

Silver is a very good money; to be distributed widely among the people for use in the daily small transactions of life; but it is not easily carried about in large amounts. Sound paper money, greenbacks or national bank notes, are far more desirable. Even when redemption day arrives, therefore, few persons will present their greenbacks for redemption. These notes will be needed for the same service they perform now and will, therefore, remain in circulation. The volume of money in the country will be increased by the monthly addition of \$4,000,000 silver authorized by the silver bill—and thus the demand for more money will be satisfied, not by an issue of irredeemable shillings, but by an issue of good metallic coin.

The Rock Port Journal, by its wavering and shilly-shally course on the money question, will disgust all parties and make friends of none.

Old party lines are wholly broken down in the Kentucky Legislature, and the dominant question upon which the members divide is whether it is unconstitutional to throw paper wads at the Speaker's head. At last accounts the law-throwing party was in a majority. It is needless to say that the Speaker's sympathies are strongly with the other side.

The Maryville Democrat, which has all along been considered as one of the most fanatical greenback papers, owns up to a little man in its last issue. It says: "In Stewart's New York dry goods house (retail department) during the last week, gold, silver, and greenbacks were used indiscriminately in making change with customers. This might be pronounced an advertising dodge; but it was only an evidence that all kinds of currency are now at par with one another, and that Stewart's people were shrewd enough to make a practical exhibition of the fact."
